// SUMMARY

I have 5 years of programming background and 3 years doing it professionally. I am an autodidact person, for I always try to learn new things that help me to improve my skills as software engineer. My strongest skills are **JavaScript** along with **ReactJS**, and **NodeJS**.

// TECHNICAL SKILLS SUMMARY

- JavaScript
- ReactJS
- Redux
- NodeJS & NPM
- Loopback
- ExpressJS
- Bootstrap
- TypeScript
- MySQL
- MongoDB
- React Native
- GraphQL
- Apollo Server
- Material-UI

// WORK EXPERIENCE

Unosquare

(March 2018 - August 2019)

Software engineer – Team leader

As a software engineer, I worked remotely with a team of senior software engineers from USA. I got involved in the whole application development. My main role was overseeing and developing the front-end project, Coordinating the frontend team in order to get deliveries in time and with best quality. As secondary tasks I was able to help my co-workers with backend tasks.

Stack: ReactJs, Redux, Hooks, ExpressJs, TypeScript, NodeJs, MySQL

Software Insights

(March 2016 - Feb 2018)

Full-stack developer

As a full-stack developer, I worked in the whole process of an application. Developing the API's that connect the web platform with the rest of the backend services and databases.

Stack: ExpressJs, Loopback, MongoDB, MySQL, Angular

// OPEN SOURCE CONTRIBUTIONS

Material-UI library

(React library)

Issue: One of the props being passed to a react component was not working properly; a fix was required for that.
